| Klon-Bezeichnung         | YM-1                                                                                                                                                                                                                                           |
| Isotyp                   | IgG2a                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">10630</a>                                                                                                                                                                                                                          |
| Quelle                   | This antibody was concentrated from hybridoma (clone YM-1) supernatant. This hybridoma was established by fusion of mouse myeloma cell P3-U1 with Sprague-Dawley rat splenocyte immunized with human Aggrus N-terminal peptide (38a.a.-51a.a.) |

|                        |                                                                                                                                                                                                                                                                 |
