## Product Datasheet

### Chicken anti-native Green Fluorescent Protein, Clone: [Polyclonal], Gallus, Monoclonal NMB-BII-NGFPABC1-100

Artikelname	Chicken anti-native Green Fluorescent Protein, Clone: [Polyclonal], Gallus, Monoclonal
Artikelnummer	NMB-BII-NGFPABC1-100
Hersteller Artikelnummer	Bii-nGFPabC1-100
Alternativnummer	NMB-BII-NGFPABC1-100
Hersteller	NordicMubio
Wirt	Gallus
Kategorie	Antikörper
Applikation	ELISA, WB
Produktbeschreibung	Green fluorescent protein (GFP) is a 27kD protein which was originally identified in the photo organs of Aequorea victoria (A. victoria) jellyfish. GFP is a naturally fluorescent protein which emits green light at a maximum wavelength of 509 nm when ...
Klonalität	Monoclonal
Konzentration	1mg/ml
Klon-Bezeichnung	[Polyclonal]
UniProt	<a href="#">P42212</a>
Puffer	Each vial contains 100µl 1 mg/ml polyclonal antiserum in 10 mM TRIS buffer pH 8.0, containing 0,15 mM NaCl and 0.02% sodium azide.

Quelle	The anti-GFP antibody is a chicken polyclonal antiserum obtained from whole egg yolk of chickens immunised with highly purified native GFP derived from <i>Aequorea victoria</i> jellyfish.
Reinheit	Ammonium sulfate precipitation
Formel	Each vial contains 100µl 1 mg/ml polyclonal antiserum in 10 mM TRIS buffer pH 8.0, containing 0,15 mM NaCl and 0.02% sodium azide. The antibodies were purified by ammonium sulfate precipitation.
Anwendungsbeschreibung	Western Blotting ELISA
