Anwendungsbeschreibung	For use with Lass2 polyclonal antibodies (Cat. No. X2307P & X2309P). Optimal concentration should be evaluated by serial dilutions. Use: Incubate antibody neat with at least a 50 fold stoichiometric excess of blocking peptide at 37C for 20 minutes (molecular weights of peptide and antibody are ~2.5 kDa and ~160 kDa, respectively). Antibody can then be diluted to a concentration suitable for Western blot. Example: 10 µl or 10 µg of Exalphas rabbit anti-Lass2 (Cat. No. X2309P) is added to 10 µg of blocking peptide for a total volume of 20 µl. The mixture is allowed to incubate for 20 minutes at 37C prior to dilution in suitable buffer (for Western blot, etc.).
