| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This assay allows for reproducible, accurate and precise determination of IgG , IgA and IgM antibodies (total) to human Hsp70 in serum. The ELISA kit uses recombinant human Hsp70 bound to the wells of the plate to bind anti-human Hsp60 antibodies pre... |
| Sensitivitaet            | 6.79 ng/ml (range 31.25 - 1,000 ng/ml)                                                                                                                                                                                                                        |
| Target-Kategorie         | HSP70, IgG, IgA, IgM                                                                                                                                                                                                                                          |
| Anwendungsbeschreibung   | For the quantitative determination of anti-HSP70 IgG/A/M autoantibodies in human serum. Cited sample types include human plasma as well as rat serum or rat plasma.                                                                                           |
