| Hersteller               | Abcepta                                                                                                                                                                                                                                                     |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                            |
| Produktbeschreibung      | SARS-CoV-2 makes accessory proteins that help it infect its human host, replicate and eventually led to human to human transmission. An 81 nucleotide deletion in SARS-CoV-2 ORF7a was recently identified from mutatiopn surveillance of field samples ... |
| NCBI                     | <a href="#">43740573</a>                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">P0DTC7</a>                                                                                                                                                                                                                                      |
| Formulierung             | Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.                                                                                                                        |
