## Product Datasheet

### **Mono-Methyl-Histone H3 (Lys9)/H3K9me1 Antibody, Unconjugated, Rabbit, Polyclonal AFB-DF6936**

|                          |                                                                                                                              |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Artikelname              | Mono-Methyl-Histone H3 (Lys9)/H3K9me1 Antibody, Unconjugated, Rabbit, Polyclonal                                             |
| Artikelnummer            | AFB-DF6936                                                                                                                   |
| Hersteller Artikelnummer | DF6936                                                                                                                       |
| Alternativnummer         | AFB-DF6936-100,AFB-DF6936-200                                                                                                |
| Hersteller               | Affinity Biosciences                                                                                                         |
| Wirt                     | Rabbit                                                                                                                       |
| Kategorie                | Antikörper                                                                                                                   |
| Applikation              | ChIP, ICC, IF, IHC, IP, WB                                                                                                   |
| Spezies Reaktivität      | Human, Mouse                                                                                                                 |
| Immunogen                | A synthetic methylated peptide derived from human Mono-Methyl-Histone H3 around the methylation site of Lys9.                |
| Konjugation              | Unconjugated                                                                                                                 |
| Klonalität               | Polyclonal                                                                                                                   |
| Reinheit                 | The antiserum was purified by peptide affinity chromatography using SulfoLink(TM) Coupling Resin (Thermo Fisher Scientific). |
| Formulierung             | Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.                           |
| Antibody Type            | Primary Antibody                                                                                                             |

Application Verdünnung

WB 1:500-1:2000, IHC 1:50-1:200, IF/ICC 1:50-1:200, IP 1:50-1:200,  
CHIP 1:50-1:200
