| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Human milk fat globule membranes (GP1.4), Delipidated extract of human milk fat globule membranes (E29)                                                                                                                                                       |
| Produktbeschreibung      | In Western blotting, it recognizes proteins in MW range of 265-400kDa, identified as different glycoforms of EMA. The alpha subunit has cell adhesive properties. It can act both as an adhesion and an anti-adhesion protein. EMA may provide a protectiv... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [GP1.4 + E29]                                                                                                                                                                                                                                                 |
| Molekulargewicht         | 265-400kDa                                                                                                                                                                                                                                                    |

|                        |                                                                                                                                                                                                                                                               |
