| Application Verdünnung   | WB: User Defined                                                                                                                                                                                                                                               |
| Anwendungsbeschreibung   | Fluorescence technology is widely used to detect proteins in both the visible and near-infrared ranges. This product allows for superior signal detection and lower background noise when fluorochrome conjugated antibodies are used to visualize proteins in |
