| Kategorie                | Zellen/Zellkultur                                                                                                                                                                                                                                              |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                   |
| Konzentration            | 1.0 mg/mL by modified Lowry assay                                                                                                                                                                                                                              |
| Puffer                   | 1X SDS-PAGE Sample Buffer (62.5 mM Tris HCl, 2% SDS, 10% Glycerol and 0.005% bromophenol blue, pH 6.8)                                                                                                                                                         |
| Quelle                   | Rat                                                                                                                                                                                                                                                            |
| Formulierung             | Liquid (sterile filtered)                                                                                                                                                                                                                                      |
| Application Verdünnung   | WB: User Optimized                                                                                                                                                                                                                                             |
| Anwendungsbeschreibung   | Ready-to-use lysates are especially prepared as positive controls for separation by SDS-PAGE and subsequent western blot analysis. Lysates are prepared in denaturing buffer WITHOUT dissociating agents (i.e. no 2-mercaptoethanol or dithiothreitol has been |
