| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | lysate of SU-DHL-1 Nuclei                                                                                                                                                                                                                                     |
| Produktbeschreibung      | Recognizes a protein of ~76kDa, which is identified as Nucleolin (NCL). It is the major nucleolar phosphoprotein of growing eukaryotic cells. NCL is located mainly in dense fibrillar regions of the nucleolus. It is found associated with intranucleola... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
