| Hersteller               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment of human TNFRSF8 protein(CD30) (Epitope is cytoplasmic aa 495-595)                                                                                                                                                                       |
| Produktbeschreibung      | Recognizes a single chain glycoprotein of 105/120kDa, identified as CD30/Ki-1. Its epitope is located somewhere between aa 580-595 (cytoplasmic). CD30 is synthesized as a 90kDa precursor, which is processed in the Golgi complex into a membrane-bound ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [rKi-1/6913]                                                                                                                                                                                                                                                  |
| Molekulargewicht         | 105-120kDa                                                                                                                                                                                                                                                    |

|              |                                                                                                                                                 |
