## Product Datasheet

### Anti-VSV-G-tag pAb-Agarose, Clone: [Polyclonal], Rabbit MBL-563-8

|                          |                                                                                                                                                            |

| Artikelname              | Anti-VSV-G-tag pAb-Agarose, Clone: [Polyclonal], Rabbit                                                                                                    |
| Artikelnummer            | MBL-563-8                                                                                                                                                  |
| Hersteller Artikelnummer | 563-8                                                                                                                                                      |
| Alternativnummer         | MBL-563-8                                                                                                                                                  |
| Hersteller               | MBL                                                                                                                                                        |
| Wirt                     | Rabbit                                                                                                                                                     |
| Kategorie                | Antikörper                                                                                                                                                 |
| Applikation              | IP                                                                                                                                                         |
| Immunogen                | synthetic peptide YTDIEMNRLGK-CP (carrier protein)                                                                                                         |
| Konjugation              | Agarose                                                                                                                                                    |
| Produktbeschreibung      | Anti-VSV-G-tag pAb-Agarose, Rabbit, Polyclonal...                                                                                                          |
| Klonalität               | Polyclonal                                                                                                                                                 |
| Klon-Bezeichnung         | [Polyclonal]                                                                                                                                               |
| Isotyp                   | IgG                                                                                                                                                        |
| Puffer                   | 430 µg of anti-VSV-G-tag polyclonal antibody covalently coupled to 200 µL of agarose gel and provided as a 50% gel slurry (in PBS/0.09% NaN <sub>3</sub> ) |

|                        |                                                                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quelle                 | This antibody was purified from rabbit serum using affinity column.<br>The rabbit was immunized with carrier protein (CP) conjugated synthetic peptide, CP-YTDIEMNRLGK. |
| Target-Kategorie       | VSV-G                                                                                                                                                                   |
| Application Verdünnung | IP: 20 µL                                                                                                                                                               |
