## Product Datasheet

### Anti-CD11c (Mouse) mAb-Biotin, IgG2a, Clone: [223H7], Rat, Monoclonal MBL-M100-6

|                          |                                                                          |
|--------------------------|--------------------------------------------------------------------------|
| Artikelname              | Anti-CD11c (Mouse) mAb-Biotin, IgG2a, Clone: [223H7], Rat, Monoclonal    |
| Artikelnummer            | MBL-M100-6                                                               |
| Hersteller Artikelnummer | M100-6                                                                   |
| Alternativnummer         | MBL-M100-6                                                               |
| Hersteller               | MBL                                                                      |
| Wirt                     | Rat                                                                      |
| Kategorie                | Antikörper                                                               |
| Applikation              | FC                                                                       |
| Spezies Reaktivität      | Mouse                                                                    |
| Immunogen                | C57BL/6 Mice -derived DC                                                 |
| Konjugation              | Biotin                                                                   |
| Produktbeschreibung      | Anti-CD11c (Mouse) mAb-Biotin, IgG2a, Clone: [223H7], Rat, Monoclonal... |
| Klonalität               | Monoclonal                                                               |
| Konzentration            | .5 µg/ml                                                                 |
| Klon-Bezeichnung         | [223H7]                                                                  |
| Isotyp                   | IgG2a                                                                    |
| NCBI                     | <a href="#">3687</a>                                                     |

|                        |                                                                                                                                                                                                                                               |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Puffer                 | 0.5 mg/mL in PBS/1% BSA/0.09% NaN <sub>3</sub>                                                                                                                                                                                                |
| Quelle                 | This antibody was purified from hybridoma (clone 223H7) supernatant using protein G agarose. This hybridoma was established by fusion of mouse myeloma cell Sp2/0-Ag14 with Wister rat lymphocyte immunized with murine DC from C57BL/6 mice. |
| Target-Kategorie       | CD11c                                                                                                                                                                                                                                         |
| Application Verdünnung | FCM: 2 µg/2.5 x 10 <sup>6</sup> cells. Other: 20 µL/2.5 x 10 <sup>7</sup> cells (ready for use)                                                                                                                                               |
