| Produktbeschreibung      | UTP is Uridine-5-triphosphate, which is an extremely stable nucleotide. This compound and its sodium salt are essential components of energy conversion in biological systems and can be used in various related applications in molecular biology, such a... |
| Konzentration            | 100 mM                                                                                                                                                                                                                                                        |
| Formulierung             | Liquid                                                                                                                                                                                                                                                        |
| Application Verdünnung   | In Vitro TranscriptionThe optimal working dilution should be determined by the end user.                                                                                                                                                                      |
