| Applikation              | ChIP, EMSA, FC, IHC                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant human full-length TAL1 protein                                                                                                                                                                                                                    |
| Konjugation              | CF405S                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Activation of TAL1 characterizes up to 60% of cases of human T cell acute lymphoblastic leukemia, making it the most frequent gain-of-function mutation observed in this disorder. TAL1 (also designated SCL) is a serine phosphoprotein and basic helix-l... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [BTL73]                                                                                                                                                                                                                                                       |

|                        |                                                                                                                                                                                                                                                                                               |

| Puffer                 | PBS, 0.1% BSA, 0.05% azide                                                                                                                                                                                                                                                                    |
| Quelle                 | Animal                                                                                                                                                                                                                                                                                        |
| Anwendungsbeschreibung | ELISA: For coating, order antibody without BSA, Western blot 0.5-1.0 ug/mL, Optimal dilution for a specific application should be determined. Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody |
