## Product Datasheet

### **c-Myc Oncoprotein(MYC2895R), CF405S conjugate, 0.1mg/mL, Clone: [MYC2895R], Rabbit, Monoclonal BOT-BNC042895-500**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A synthetic peptide, corresponding to aa 408-439 (AEEQKLISEEDLLRKRRERQLKHKLEQLRNSCA) from C-terminus of human c-myc, coupled to KLH.                                                                                                                          |
| Konjugation              | CF405S                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | The epitope of this antibody spans the Myc tag epitope, aa 410-419 (EQKLISEEDL), which is a specific portion of an alpha helical region of human c-myc protein. Because the epitope is located at the dimerization site of the protein, the antibody is no... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |

|                  |                            |
|------------------|----------------------------|
| Klon-Bezeichnung | [MYC2895R]                 |
| Molekulargewicht | 62-64 kDa                  |
| UniProt          | <a href="#">P01106</a>     |
| Puffer           | PBS, 0.1% BSA, 0.05% azide |
| Quelle           | Animal                     |
