| Immunogen                | Recombinant human ALK protein fragment (aa200-335)                                                                                                                                                                                                            |
| Konjugation              | CF405S                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | The wild-type anaplastic lymphoma kinase (ALK) protein is a 200 kDa transmembrane receptor tyrosine kinase. Its expression is restricted to a few scattered cells in the nervous system (some glial cells and neurons, and a few endothelial cells and per... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [ALK/3218R]                                                                                                                                                                                                                                                   |
