| Immunogen                | Osteoclasts from osteoclastomas                                                                                                                                                                                                                               |
| Konjugation              | CF568                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | ITAGV encodes integrin alpha chain V. Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. The I-domain containing integrin alpha V undergoes post-translational cleavage to yield disulfide-linked heavy a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung         | [23C6]                                                                                                                                                                                                                                                        |

|                        |                                                                                                                                                                                                                                                                   |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Molekulargewicht       | 150-160 kDa under non-reducing conditions. Under reducing conditions, it is cleaved into 2 bands of about 125-130 kDa 20-25 kDa.                                                                                                                                  |
| UniProt                | <a href="#">P06756</a>                                                                                                                                                                                                                                            |
| Puffer                 | PBS, 0.1% BSA, 0.05% azide                                                                                                                                                                                                                                        |
| Quelle                 | Animal                                                                                                                                                                                                                                                            |
| Anwendungsbeschreibung | ELISA: For coating, order antibody without BSA, Optimal dilution for a specific application should be determined. Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody |
