| Immunogen                | Recombinant full-length human TFF1 protein                                                                                                                                                                                                                   |
| Konjugation              | Biotin                                                                                                                                                                                                                                                       |
| Produktbeschreibung      | Recognizes a polypeptide of 6.5 kDa, identified as pS2 estrogen-regulated protein. Its epitope is located in the c-terminus of human pS2 protein. pS2 is a trefoil peptide. Trefoil peptides are protease resistant molecules secreted throughout the gut... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                   |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                    |
