## Product Datasheet

**MUC1 / CA15-3 / EMA / CD227 (Epithelial Marker)(VU-11D1), 1mg/mL,  
Clone: [VU-11D1], Mouse, Monoclonal  
BOT-BNUM0965-50**

|                          |                                                                                                                                                                                                                                                               |

| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Human breast cancer cell line ZR-75 cells                                                                                                                                                                                                                     |
| Produktbeschreibung      | MAB VU-11D1 reacts with MUC1, a large transmembrane glycoprotein expressed on the ductal surface of normal glandular epithelia. The dominant epitope of MAB VU-11D1 is the 7-mer TSAPDTR of the MUC1 tandem repeat as established with epitope fingerprint... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/mL                                                                                                                                                                                                                                                       |
