| Produktbeschreibung      | The AIRE Colorimetric Cell-Based ELISA Kit is a convenient, lysate-free, high throughput and sensitive assay kit that can detect AIRE protein expression profile in cells. The kit can be used for measuring the relative amounts of AIRE in cultured cell... |
| Detektionsbereich        | At least 5000 cells/well                                                                                                                                                                                                                                      |
