| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | The Dematin Colorimetric Cell-Based ELISA Kit is a convenient, lysate-free, high throughput and sensitive assay kit that can detect Dematin protein expression profile in cells. The kit can be used for measuring the relative amounts of Dematin in cult... |
| Detektionsbereich        | At least 5000 cells/well                                                                                                                                                                                                                                      |
