| Klon-Bezeichnung         | [124-1D1]                                                                                                                                                                                                                                                     |
| Puffer                   | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                       |
| Target-Kategorie         | CD7                                                                                                                                                                                                                                                           |

Anwendungsbeschreibung

Flow cytometry: The reagent is designed for analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or 10<sup>6</sup> cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests.
