| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                           |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This GENLISA Mouse Mitogen-Activated Protein Kinase 10 (MAPK10) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision ... |
| Detektionsbereich        | 15.625 - 1000 pg/ml                                                                                                                                                                                                                                           |
| Sensitivitaet            | 9.375 pg/ml                                                                                                                                                                                                                                                   |
| Proben                   | Serum, plasma and tissue homogenates. For other matrices, please connect with our technical team                                                                                                                                                              |
