| Produktbeschreibung      | PVRIG (poliovirus receptor related immunoglobulin domain-containing protein), also known as CD112 receptor (CD112R), is an approximately 34 kDa single transmembrane protein in the poliovirus receptor-like protein (PVR) family. The extracellular domai...                      |
| Molekulargewicht         | 40.6 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | 0                                                                                                                                                                                                                                                                                  |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
