| Produktbeschreibung      | The ORF1ab gene is a specifically expressed gene of SARS-CoV-2 and can be quickly and sensitively detected to indirectly indicate the level of SARS-CoV-2. The ORF1ab protein is associated with viral replication and transcription, inhibition of host t... |
| Molekulargewicht         | Approximately 60.0 kDa                                                                                                                                                                                                                                        |
| Reinheit                 | 95                                                                                                                                                                                                                                                            |
