|                        |                                                                                                                                                                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Puffer                 | Phosphate-buffered solution, pH 7.2, containing 0.05% non-protein stabilizer. Dialyze to completely remove the stabilizer prior to labeling.                                                                                                                            |
| Target-Kategorie       | TRAV8-1                                                                                                                                                                                                                                                                 |
| Application Verdünnung | FCM 2 µg/mL(0.5*10 <sup>6</sup> -1*10 <sup>6</sup> cells)                                                                                                                                                                                                               |
| Anwendungsbeschreibung | Each lot of this antibody is quality control tested by flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 1.0 µg per 10 <sup>6</sup> cells in 100 µL volume or 100 µL of whole blood. It is recommended that the reagent be t |
