| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Virus                                                                                                                                                                                                                                         |
| Molekulargewicht         | calculated_mw: 26.5 kDa. observed_mw: 35.1 kDa                                                                                                                                                                                                |
| Tag                      | C-His                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">16192</a>                                                                                                                                                                                                                         |
| Expression System        | Baculovirus-Insect Cells                                                                                                                                                                                                                      |
| Reinheit                 | > 95 % as determined by reducing SDS-PAGE.                                                                                                                                                                                                    |
| Formulierung             | Lyophilized from sterile 20mM PBS,300mM NaCl,10% glycerol,pH 7.0Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization.Please refer to the specific buffer information in the printed manual. |
| Sequenz                  | Arg306-Phe527                                                                                                                                                                                                                                 |
