| Wirt                             | Donkey                                                                                                                                                       |
| Kategorie                        | Antikörper                                                                                                                                                   |
| Spezies Reaktivität              | Guinea pig                                                                                                                                                   |
| Konjugation                      | Cy3                                                                                                                                                          |
| Format                           | IgG                                                                                                                                                          |
| Spezifität                       | IgG (H+L)                                                                                                                                                    |
| Minimale Kreuzreaktivität (MinX) | Bovine,Gallus,Goat,Hamster<br>(syrian),Equine,Human,Mouse,Rabbit,Rat,Sheep                                                                                   |
| Klonalität                       | Polyclonal                                                                                                                                                   |
| Puffer                           | Buffer: 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6. Stabilizer: 15 mg/ml Bovine Serum Albumin (IgG-Free, Protease-Free).<br>Preservative: 0.05% Sodium Azide |
| Reinheit                         | AffiniPure                                                                                                                                                   |

|                        |                                                                                                                                                                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Formulierung           | Freeze-dried solid                                                                                                                                                                                                                                            |
| Lagerung               | Storage and Rehydration: Store freeze-dried solid at 2-8°C. Rehydrate with the indicated volume of dH2O and centrifuge if not clear. Prepare working dilution on day of use. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Extended... |
| Antibody Type          | Secondary Antibody                                                                                                                                                                                                                                            |
| Application Verdünnung | 1:100 - 1:800 for most applications Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.    |
