| Kategorie                | Antikörper                                                                                                                                                                                                                                                                    |
| Applikation              | FC, IHC-Fr, IHC-P, IP, WB                                                                                                                                                                                                                                                     |
| Immunogen                | DNP                                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Because Dinitrophenyl (DNP) is a hapten and not found endogenously in animal and plant tissues, the anti-DNP monoclonal antibody in nature is suitable for use as an isotype-matched control antibody to estimate the degree of non-specific binding by an...                 |
| Reinheit                 | >95% Determined by SDS-PAGE                                                                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | Applications: an isotype-matched negative control used in ELISA, Western Blot (WB), Flow Cytometry (Flow), Immunoprecipitation (IP), Immunohistochemistry (Paraffin) (IHC (P)), Immunohistochemistry (Frozen) (IHC (F)), and in vivo animal model research. Shipping: Ice Bag |
