| Hersteller               | Echelon Biosciences                                                                                                                                                                                                                                            |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Phosphatidylethanol (PEth) is formed primarily by transphosphatidylation of phosphatidylcholine (PC) by phospholipase D. Most PEth (about 75%) is incorporated into erythrocyte membranes, and is one of the longest-lived circulating EtOH metabolite yet ... |
| Anwendungsbeschreibung   | Categories: Lipids. Related: Phosphatidylethanol. Ship 1 : Shipping Temp. Ship 2: Gel Ice                                                                                                                                                                      |
