| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                            |
| Produktbeschreibung      | Inositol phosphates are important signaling molecules involved in numerous cellular functions. Inositol 1,3,4,6-tetrakisphosphate (Ins(1,3,4,6)P4) is an intermediate in the synthesis of InsP6 (phytic acid), being phosphorylated by Ins(1,3,4,6)P4 5-k... |
| Anwendungsbeschreibung   | Categories: Lipids. Related: Inositol Phosphate. Ship 1 : Shipping Temp. Ship 2: Dry ice or gel ice depending on destination                                                                                                                                 |
