| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                                 |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                               |
| Produktbeschreibung      | The GENLISA Human Cathelicidin-1 (CATHL1) ELISA includes features like: Ready to use protocol with break-apart wells for ease of use<br>Standardisation and High Reproducibility Lot to Lot Consistency<br>Accuracy and Precision Validated against seven points... |
| Detektionsbereich        | 0.156 - 10 ng/ml                                                                                                                                                                                                                                                    |
| Sensitivitaet            | 0.066 ng/ml                                                                                                                                                                                                                                                         |
| Proben                   | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                                  |
| Anwendungsbeschreibung   | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                          |
