| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The Glypican-3 (GPC3) protein is a cell surface proteoglycan that plays complex regulatory roles in key signaling pathways critical to developmental processes. Through its GPI anchoring, GPC3 negatively regulates the Hedgehog signaling pathway by com... |
| Molekulargewicht         | Approximately 40 kDa & 60 kDa & 100-120 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                           |
| Formel                   | 2719(Gene_ID)P51654-1 (Q25-H559)(Accession)                                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
