| Konjugation              | Unconjugated                                                                                                                                                                                                                        |
| Produktbeschreibung      | Recruits TFIID to the initiation complex and stimulates the RNA polymerase II C-terminal domain kinase and DNA-dependent ATPase activities of TFIID. Both TFIID and TFIIE are required for promoter clearance by RNA polymerase.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                          |
| Molekulargewicht         | Calculated MW: 49 kDa , Observed MW: 60 kDa                                                                                                                                                                                         |
| UniProt                  | <a href="#">P29083</a>                                                                                                                                                                                                              |
| Puffer                   | Purified antibody in PBS with 0.05% sodium azide,0.05% BSA and 50% glycerol.                                                                                                                                                        |

|                        |                                                                   |
