| Hersteller               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Prokaryotic recombinant protein corresponding to a 170 amino acid truncate (266 to 436aa) of the CD66a molecule.                                                                                                                                              |
| Produktbeschreibung      | CD66a antigen, also known as biliary glycoprotein (BGP), is a member of the carcinoembryonic antigen (CEA) family and of the immunoglobulin superfamily. Products of four of the seven functional CEA family genes (CD66a, CD66b, CD66c and CD66d) are kno... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [r29H2]                                                                                                                                                                                                                                                       |
| Molekulargewicht         | 90-180kDa                                                                                                                                                                                                                                                     |

|              |                                                                                                                                                                           |
