| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Rat                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Rat HbA1c. During the reaction, Rat HbA1c in the sample or standard competes with a fixed amount of Rat HbA1c on the solid phase ... |
| Detektionsbereich        | 12.35-1000µg/mL                                                                                                                                                                                                                                               |
| Sensitivitaet            | 5.05µg/mL                                                                                                                                                                                                                                                     |
| Proben                   | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target-Kategorie         | HbA1c                                                                                                                                                                                                                                                         |
