| Produktbeschreibung      | This gene encodes a five transmembrane protein that functions as a major regulator of the innate immune response to viral and bacterial infections. The encoded protein is a pattern recognition receptor that detects cytosolic nucleic acids and transmi... |
| Tag                      | N-His                                                                                                                                                                                                                                                         |
