| Produktbeschreibung      | TSPEAR, also known as C21orf9, is a 669 amino acid secreted protein. Expressed as two isoforms produced by alternative splicing, TSPEAR contains one Thrombospondin N-terminal domain and seven EAR (epilepsy-associated repeat) domains. EAR domains are ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |
| Puffer                   | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                       |
| Quelle                   | KLH conjugated synthetic peptide derived from human TSPEAR/C21orf9                                                                                                                                                                                            |

|                        |                                                                                              |
|------------------------|----------------------------------------------------------------------------------------------|
| Target-Kategorie       | TSPEAR                                                                                       |
| Application Verdünnung | WB(WB=1:500-2000), ELISA(ELISA=1:5000-10000), IHC-P(IHC-P=1:100-500), IHC-F(IHC-F=1:100-500) |
