| Wirt                             | Rabbit                                                     |
| Kategorie                        | Antikörper                                                 |
| Applikation                      | ELISA,IHC,WB                                               |
| Spezies Reaktivität              | Rat                                                        |
| Immunogen                        | Rat IgM mu heavy chain                                     |
| Konjugation                      | Unconjugated                                               |
| Format                           | Antiserum                                                  |
| Spezifität                       | IgM ( $\mu$ )                                              |
| Minimale Kreuzreaktivität (MinX) | no cross-adsorbtion                                        |
| Klonalität                       | Polyclonal                                                 |
| Konzentration                    | 90 mg/mL                                                   |
| Puffer                           | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 |

|                        |                                                                                                                                                                                                                                                                                               |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reinheit               | This product was prepared from monospecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-rabbit serum, Rat IgM and Rat Serum. No reaction was observed against Rat IgG F(ab') <sub>2</sub> or Rat IgG F(c). |
| Formulierung           | Lyophilized                                                                                                                                                                                                                                                                                   |
| Antibody Type          | Secondary Antibody                                                                                                                                                                                                                                                                            |
| Application Verdünnung | ELISA Dilution: 1:20,000 - 1:100,000, Immunohistochemistry Dilution: 1:1,000 - 1:5,000, Western Blot Dilution: 1:2,000 - 1:10,000                                                                                                                                                             |
| Anwendungsbeschreibung | Anti-Rat IgM antibody is suitable for use in ELISA, immunohistochemistry, and western blot. Specific conditions for reactivity should be optimized by the end user.                                                                                                                           |
