| Hersteller               | Vector Biolabs                                                                                                                                                                                                                                                |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The IκB kinases, IKK(alpha) (previously designated CHUK) and IKK(beta), are members of the helix-loop-helix, leucine zipper family of interacting proteins. IKK(alpha) specifically phosphorylates IκB(alpha) on the sites, serines 32 and 36, to trigger ... |
| Konzentration            | 1x10 <sup>10</sup> PFU/ml                                                                                                                                                                                                                                     |
| Puffer                   | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                                   |
