Product Datasheet

Recombinant Human BNIP3 (N-6His) EBT-EPT241

Artikelname	Recombinant Human BNIP3 (N-6His)
Artikelnummer	EBT-EPT241
Hersteller Artikelnummer	EPT241
Alternativnummer	EBT-EPT241-50
Hersteller	ELK Biotechnology
Kategorie	Proteine/Peptide
Produktbeschreibung	Recombinant Human Adenovirus E1B 19 kDa Protein-Interacting Protein 3 is produced by our E.coli expression system and the target gene encoding Met1-Leu166 is expressed with a 6His tag at the N-terminus....
Molekulargewicht	Molecular weight: 20.6 KDa. Apparent molecular weight: 28 KDa, reducing conditions
UniProt	AAH21989.1
Reinheit	Greater than 95% as determined by reducing SDS-PAGE.

Anwendungsbeschreibung	Redissolve: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.. Endotoxin: Less than 0.1 ng/µg (1 EU/µg) as determined by LAL test. Background: BCL2/Adenovirus E1B 19 kDa Protein-interacting Protein 3 (BNIP3) is a single-pass membrane protein. BNIP3 is a member of the NIP3 family. BNIP3 contains a single Bcl-2 homology 3 domain and interacts with the E1B 19 kDa protein. BNIP3 have been associated with pro-apoptotic function. BNIP3 is an apoptosis-inducing protein that can overcome BCL2 suppression. It plays a role in repartitioning calcium between the two major intracellular calcium stores in association with BCL2. BNIP3 involved in mitochondrial quality control via its interaction with SPATA18/MIEAP, response to mitochondrial damage, participates to mitochondrial protein catabolic process
