Anwendungsbeschreibung	Abbkine One-step TUNEL Apoptosis Assay Kit (Orange Fluorescence) relies on the presence of nicks in the DNA which can be identified by TdT, an enzyme that catalyzes the addition of dUTPs that are labeled with fluorescein. This kit provides all the essential components with an optimized assay protocol, suitable for fluorescence microplate reader, fluorescence microscope, or flow cytometer. Its signal can be easily detected (Ex/Em = 555nm/565 nm).
