CheKine(TM) Micro Alanine Aminotransferase (ALT/GPT) Activity Assay Kit **ASC-KTB1410**

Artikelname	CheKine(TM) Micro Alanine Aminotransferase (ALT/GPT) Activity Assay Kit
Artikelnummer	ASC-KTB1410
Hersteller Artikelnummer	KTB1410
Alternativnummer	ASC-KTB1410-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Produktbeschreibung	Abbkine CheKine(TM) Alanine Aminotransferase (ALT/GPT) Activity Colorimetric Assay Kit is designed for detecting ALT/GPT activity in the sample....
Tag	ALT/GPT
Anwendungsbeschreibung	The kit provides a simple method for detecting ALT/GPT activity in a variety of biological samples such as animal tissues, plant tissues, cell culture: adherent or suspension cells, serum, bacterial. In the assay, ALT catalyzes the transamination reaction of alpha-ketoglutarate and alanine at 37C and pH7.4 to produce glutamic acid and pyruvate, pyruvate can react with 2,4-dinitrophenylhydrazine to form Pyruvate phenylhydrazone, which appears brownish red under alkaline conditions and has a characteristic absorption peak at 505 nm. The rate of pyruvate phenylhydrazone increase at 505 nm can reflect ALT/GPT activity.
