| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Interleukin 31 (IL-31) is an 18 kDa cytokine with 142 amino acid residues. IL-31 is mainly secreted from activated CD4+ T cells and binds to a receptor called IL-31RA. Upon binding to 31RA, IL-31 activates several signal pathways like MAPK, PI3K/AKT,... |
| Molekulargewicht         | 16.78 kDa                                                                                                                                                                                                                                                     |
| Tag                      | IL-31                                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q6EBC2</a>                                                                                                                                                                                                                                        |
| Reinheit                 | >98% as determined by SDS-PAGE.                                                                                                                                                                                                                               |
| Formulierung             | Lyophilized from PBS, pH 8.0                                                                                                                                                                                                                                  |
| Sequenz                  | Amino acid sequence derived from Human IL-31 (Ser24-Thr164) (Q6EBC2) was expressed with 6*His tag at the C-terminus                                                                                                                                           |
| Anwendungsbeschreibung   | Human                                                                                                                                                                                                                                                         |
