## Product Datasheet

**ML-SA1, CAS [[332382-54-4]]**

**FBM-10-1439**

Artikelname	ML-SA1, CAS [[332382-54-4]]
Artikelnummer	FBM-10-1439
Hersteller Artikelnummer	10-1439
Alternativnummer	FBM-10-1439-10MG,FBM-10-1439-50MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	TRPML activator...
Molekulargewicht	362.43
Reinheit	98% by HPLC NMR (Conforms)
Formulierung	Tan solid
CAS Nummer	[332382-54-4]
Formel	C22H22N2O3
Anwendungsbeschreibung	<p>TRPML 1,2 and 3 channel activator.1 Does not activate TRPM2, TRPV2, TRPV3, TRPC6 or TRPA1 channels.2 ML-SA1 robustly activates whole cell TRPML1-4A and whole-endolysosome TRPML1 and is comparable (10 <math>\mu</math>M) to the effect of the endogenous TRPML agonist, PI(3,5)P2 (1 <math>\mu</math>M).2 Thus it is a useful chemical tool for studying the functions of TRPMLs. It induces TRPML-mediated Ca<sup>2+</sup> release from lysosomes which corrects trafficking defects and reduces cholesterol accumulation in Niemann-Pick type C macrophages.2,3 Reduces intralysosomal Ca<sup>2+</sup> level rescuing abnormal lysosomal storage in FIG4-deficient cells.4</p>
