Product Datasheet

Hypericin, CAS [[548-04-9]] FBM-10-2077

Artikelname	Hypericin, CAS [[548-04-9]]
Artikelnummer	FBM-10-2077
Hersteller Artikelnummer	10-2077
Alternativnummer	FBM-10-2077-1MG,FBM-10-2077-10MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Protein kinase C inhibitor...
Molekulargewicht	504.45
Reinheit	>98% by TLC NMR (Conforms)
Formulierung	Brown solid
CAS Nummer	[548-04-9]
Formel	C30H16O8
Anwendungsbeschreibung	Natural product found in St. Johns Wort (Hypericum perforatum). A multifunctional agent that has been reported to be antidepressive, antineoplastic, antitumor and antiviral. Inhibitory effects have been demonstrated on various enzyme including MAO, PKC, dopamine-β-hydroxylase, reverse transcriptase, telomerase and CYP.1 Hypericin can cause photosensitivity - as a result, it is being investigated as an agent in photodynamic therapy.2
