Product Datasheet

TPCA-1, CAS [[507475-17-4]] FBM-10-5571

Artikelname	TPCA-1, CAS [[507475-17-4]]
Artikelnummer	FBM-10-5571
Hersteller Artikelnummer	10-5571
Alternativnummer	FBM-10-5571-5MG,FBM-10-5571-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Selective inhibitor of IkappaB kinase 2 (IKK2)...
Molekulargewicht	229.29
Reinheit	98% by TLC NMR (Conforms)
Formulierung	Pale yellow solid
CAS Nummer	[507475-17-4]
Formel	C12H10FN3O4S
Anwendungsbeschreibung	Selective inhibitor of IkappaB kinase 2 (IKK2) (IC50 = 17.9 nM). ¹ Inhibits production of pro-inflammatory cytokines in arthritis and other animal models of inflammation. ^{1,2} Also attenuates NLRP3 inflammasome activation in THP-1 myeloid cells, and suppresses IL1beta-induced proliferation, migration, and invasion of HeLa cells. ^{3,4} Continuous exposure to TPCA-1 promotes expansion of hematopoietic stem/progenitor cells (HSPCs) via improved glycolysis and limited ROS production. ⁵
