| Hersteller               | reddot Biotech                                                                                                                                                                                                                                                |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Retinoic Acid Receptor Alpha (RARa) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates and other biological fluids . This product is for Research Use Only.... |
| Detektionsbereich        | 0.156-10ng/mL                                                                                                                                                                                                                                                 |
| Sensitivitaet            | 0.058ng/mL                                                                                                                                                                                                                                                    |
| Proben                   | serum, plasma, tissue homogenates and other biological fluids                                                                                                                                                                                                 |
| Target-Kategorie         | Human Retinoic Acid Receptor Alpha (RARa)                                                                                                                                                                                                                     |
| Anwendungsbeschreibung   | Assay Length: 4.5 hours. Experimental Method: Sandwich                                                                                                                                                                                                        |
