| Produktbeschreibung      | This gene encodes a GTPase which is a component of the spliceosome complex which processes precursor mRNAs to produce mature mRNAs. Mutations in this gene are associated with mandibulofacial dysostosis with microcephaly. Multiple transcript variants ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
